

MAKE-DO DESIGNS

This is a pretty great idea. Your kids can make creative items from household items with these kits that try to keep things safe while inspiring creativity. This is a really important thing to do for young ones. The more they use their mind imaginatively at a young age, the more creative problem solvers they become later in life — a critical skill to success in the never linear real world.

BONSAI TREE TO CHARGE THE MOBILE PHONE

Recharge your cellphone, iPod, iPhone and camera with this USB solar powered bonsai tree. The bonsai will store energy in a hidden battery during the day, allowing you to recharge your gadgets even at night. The bonsai-charging tree cleverly hides all wires and plugs under the tray. You can rotate each part individually and produce an endless number of different shapes. The bonsai tree is decorative and good for the environment.

ENGLISH SPANISH TRANSLATOR

No need to go through the time consuming task of learning a new language when you can just put this handy gadget in your pocket. The English-Spanish Translator is a great way to have access to any Spanish or English phrases that you may find yourself needing. It is easy to use by simply typing in the word or phrase. Then the comprehensive database of thousands of words will help you know exactly what to say or translate any sign you're reading. This lightweight and simple translator is only 2.4 ounces and only 4 inches by 3 inches wide. It runs on a CR2032 battery.

VOICE RECORDER DOG TRAINER

One of the latest gadgets created for dogs is Ultrasonic Voice Recorder Dog Trainer. We know that dog training is not an easy task; some dogs are easier to train than other breeds of dogs. This gadget makes the training process a bit smoother for you. This voice recorder has been created to record your own voice and has the option to choose high frequency tones so that your dog will follow your command. The recorded voice can only be heard by your dog, which makes things easier for other members of the family if the dog only listens to you.

ARMY HELMET WITH A RADAR SYSTEM

One of the scariest things in combat is that the enemy could be anywhere, and you wouldn't know it until it was too late. This is why a miniature helmet-mounted radar system (HMRS) has been developed to let you know if people are around. The range is about 25 meters, and it is very lightweight at 2.5 pounds. One of those pounds is actually on the helmet itself.
